

Hello,

I am writing to you to notify you that today our gym club was informed by a parent that their child has tested positive for COVID-19. Their child was in the gym club and specifically your child's class on

Date

As of Friday, November 6th, AHS will only be directly notifying close contacts of confirmed COVID-19 cases in three priority groups of which sport activities is not one. As such, we are contacting you on behalf of the parents who have given us their permission to share this information.

With the club's protocols of maintaining 2 metres/6 feet of distance at all times and our strenuous cleaning regimen, you and your family are not required to take any further actions at this time. Should there be any further instructions, or we are notified by AHS we will be in contact immediately.

In the meantime, please make sure you are referring to the checklist provided by AHS and paying specific attention to the following:

- A child with only one non-core symptom should stay home and be monitored for 24 hours. Testing is not needed if symptoms improve. The child can resume normal activities when they feel well.
- A child with two or more non-core symptoms, or if one symptom gets worse, should get tested. They should stay home until the symptoms go away, or they test negative and feel better.

We again ask, that if your child is feeling unwell, or has had known close contact with someone who has tested positive that you keep them home and away from the club.

Should you have any questions, please do not hesitate to contact the club at _____.
